Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. If eye irritation persists, get medical advice/attention.

#### Ingestion

Rinse mouth. If you feel unwell, seek medical advice.

### 4.2. Most important symptoms and effects, both acute and delayed

## SECTION 5: Firefighting measures

### 5.1. Extinguishing media

#### Suitable extinguishing media

Foam, Dry powder, Carbon dioxide, Water spray, Sand

#### Unsuitable Extinguishing Media

Do not use a solid water stream as it may scatter and spread fire.

### 5.2. Special hazards arising from the substance or mixture

Burning produces irritating, toxic and noxious fumes

Combustible dust

Dust may form explosive mixture in air. Dust cloud in combination with static electricity can very be explosive

### 5.3. Advice for firefighters

#### Special protective equipment for firefighters

Fire fighter protection should include a self-contained breathing apparatus (NIOSH-approved or EN 133) and full fire-fighting turn out gear.

#### Precautions for firefighting

Use water spray or fog for cooling exposed containers. Exercise caution when fighting any chemical fire. Prevent fire fighting water from entering the environment. Keep people away from and upwind of fire. Do not enter fire area without proper protective equipment, including respiratory protection. Wear fire/flame resistant/retardant clothing. EN469.

## SECTION 6: Accidental release measures

### 6.1. Personal precautions, protective equipment and emergency procedures

For non-emergency personnel: For personal protective equipment see section 8. Avoid contact with skin, eyes and clothing. Avoid creating or spreading dust. Do not breathe vapor. Do not breathe dust. Use personal protective equipment as required. Ground/bond container and receiving equipment. Evacuate unnecessary personnel.

For emergency responders: Personal protection see section 8.

### 6.2. Environmental precautions

Prevent entry to sewers and public waters. Prevent further leakage or spillage. Do not discharge product into the aquatic environment without pretreatment (biological treatment plant).

### 6.3. Methods and material for containment and cleaning up

#### Methods for containment

Avoid generating dust. Contain and collect as any solid.

#### Methods for cleaning up

On land, sweep or shovel into suitable containers. Minimize generation of dust. Store away from other materials. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours).

### 6.4. Reference to other sections

For personal protective equipment see section 8.

## SECTION 7: Handling and storage

### 7.1. Precautions for safe handling

#### Advice on safe handling

Wash hands and other exposed areas with mild soap and water before eating, drinking or smoking and when leaving work. Provide good ventilation in process area to prevent formation of vapor. Ground/bond container and receiving equipment.

#### Hygiene measures

Do not eat, drink or smoke during use.

#### Advice on the protection of the environment

See Section 8: Environmental exposure controls.

#### Incompatible products

Moisture  
Strong oxidizers  
Sources of ignition  
Direct sunlight  
Heat, flames and sparks

### 7.2. Conditions for safe storage, including any incompatibilities

#### Advice on protection against fire and explosion

Risk of dust explosion in fine crystalline powder form. Dust can form an explosive mixture in air. Keep away from sources of ignition - No smoking. Take necessary action to avoid static electricity discharge (which might cause ignition of organic vapours). In case of fire, emergency cooling with water spray should be available. Ground and bond containers when transferring material.

#### Technical measures/Storage conditions

Proper grounding procedures to avoid static electricity should be followed. Keep only in the original container. Keep container closed when not in use. Store in dry, cool, well-ventilated area. Store in a dark area.

## Notes

For details and further information please refer to the original regulation.

## DNEL & PNEC

Not required.

## 8.2. Exposure controls

### Special adaptations (REACH)

This substance is exempted from REACH (1907/2006).

### Appropriate Engineering controls

Avoid dispersal of dust in the air (clearing dust surfaces with compressed air). Emergency eye wash fountains and safety showers should be available in the immediate vicinity of any potential exposure. Provide local exhaust or general room ventilation. Use spark-/explosion proof appliances and lighting system.

### Personal protective equipment

#### General industrial hygiene practice

Do not eat, drink or smoke during use.

#### Hygiene measures

Do not eat, drink or smoke during use.

#### Eye protection

Chemical goggles or safety glasses. When handling in molten state: Face shield.  
Equipment should conform to EN 166

#### Hand protection

Wear dust impervious gloves. Nitrile rubber. Neoprene/natural rubber. Heat protective impervious gloves when handling molten product.

#### Skin and body protection

Wear suitable protective clothing.

#### Respiratory protection

In case of inadequate ventilation wear respiratory protection. Appropriate dust or mist respirator should be used if airborne particles are generated when handling this material.

#### Thermal Hazard

Flame retardant clothing should be used when handling in molten state.

#### Environmental exposure controls

If possible use in closed systems. If leakage can not be prevented, the substance needs to be suck off at the emersion point, if possible without danger. Observe the exposure limits, clean exhaust air if needed. If recycling is not practicable, dispose of in compliance with local regulations. Inform the responsible authorities in case of leakage into the atmosphere, or of entry into waterways, soil or drains.
